

Website Whitelisting

As part of your organization’s implementation of the fully digital Learning Beyond Paper curriculum platform, we want to ensure you have the information necessary to configure your network settings for optimal performance.

Why Website Whitelisting is Needed

School and district networks often have firewalls, web filters, or security policies that restrict access to external websites by default. Many of the core services that power our curriculum—such as interactive lessons, media streaming, document access, and teacher tools—operate on multiple domains. If these domains are blocked, it can result in:

- ▶ Incomplete or missing lesson content.
- ▶ Broken links, video playback issues, or missing templates.
- ▶ Login or dashboard errors for teachers and administrators.

Whitelisting (allow-listing) ensures uninterrupted access to these essential services.

Who Should Complete This Task?

Your district IT department, technology coordinator, or whoever manages your network security settings.

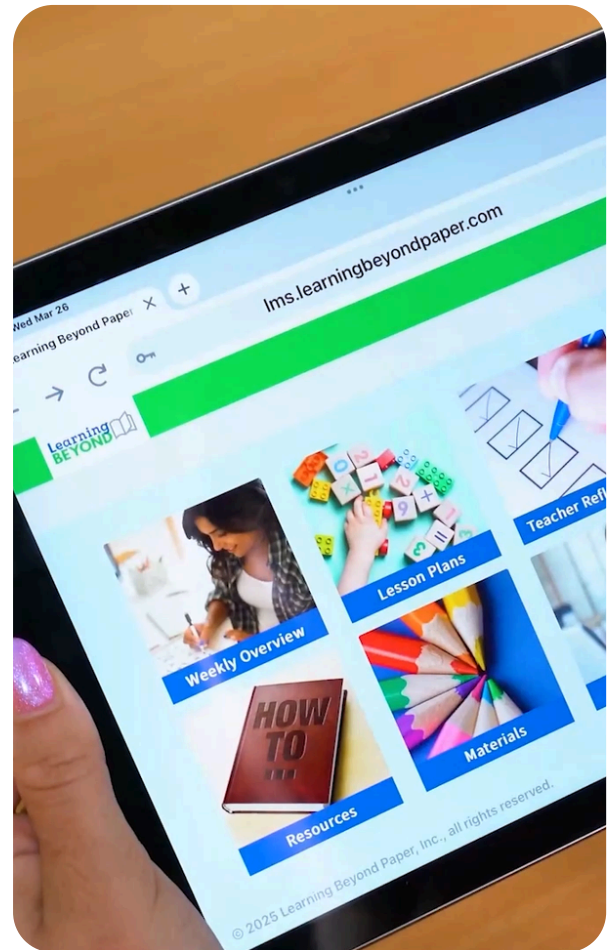

If You Experience Issues:

Please contact our Support Team if you encounter any access problems after whitelisting:

If your firewall allows wildcard entries, we recommend whitelisting full domains with wildcards to simplify updates:

- ▶ *.learningbeyondpaper.com
- ▶ *.lms.learningbeyondpaper.com
- ▶ *.lms-api.learningbeyondpaper.com
- ▶ *.2belive.net
- ▶ *.acrobat.adobe.com
